

Please do NOT allow our Wisconsin state "NO CALL" law to be amended or changed in any way. If consumers want contact with a business/company, they are adept enough to contact that company on their own. Our privacy & time is too valuable; please don't allow unwanted telemarketers to "enter" our homes. More consumers will be forced to make their numbers "private/unlisted" or purchase "call zappers"--privacy from telephone hounding should not require such a price. Thank you.
